COURSES TAUGHT

Eckerd College

MN 110S: Principles of Management and Leadership

Introduction to interdisciplinary nature of management and leadership. Survey of historical development of management as a discipline, functional areas of management, comparison of management and leadership, contemporary issues in management and leadership.

MN 242S: Ethics of Management: Theory and Practice

Ethical theories as they relate to personal and organization policies and actions. Analyzing situations which require moral decisions in the organizational context.

MN 411: Social Entrepreneurship

Delineating common and distinguishing features of social purpose businesses and entrepreneurial non-profits, rationale and means for developing partnerships between for-profit, non-profit, and civic organizations to pursue social entrepreneurship initiatives.

MN 351E: Technology, Society, and Environment

Introduction to sustainable business. Interdependent relationship of technological and social change with emphasis on evolution of models of production and service delivery, and organizational structure and functioning. Impact of demographic composition, environmental resources, economic and political structures.

WT 5S: Entrepreneurship: Theory and Application

This course explores the dynamics of entrepreneurship and the importance of opportunity selection by examining economic sectors. Students will gain an understanding of how to identify specific opportunities and challenges for business expansion, and will apply those insights through a sector study in groups. These sectors will include but are not limited to biotechnology, computer technology, social networking, music industry, and financial services.

*Lake Forest Graduate School of Management***MBA 5807 Ethical Leadership & Decision Making**

Provides an understanding of how values shape individual ethical behaviors, and how these behaviors influence leadership and decision-making. The course provides practical knowledge and tools needed to effectively manage the everyday ethical conduct of employees. The course will also discuss how legal, philosophical, and corporate practices influence ethical behavior for individuals and companies. Students examine how social, environmental and stakeholder responsibilities, and different values impact ethical behavior in companies.

*St. Petersburg College***PHI 1600 Studies in Applied Ethics**

This course is a practical overview of key issues, questions and concepts in applied ethics. Special emphases are placed on the historical development of ethical thinking, a variety of ethical approaches and on multicultural aspects of ethics. Students will also examine a variety of personal, social, and professional ethical issues and problems and learn methods of resolving them through the use of critical thinking skills, sound ethical reasoning and legal and professional codes. Students are provided an active learning experience, increased student interaction and opportunities for independent research into ethical issues of personal interest.

BUL 2241 Business Law I

This course is comprised of a study of the nature, classification and characteristics of law including the study of jurisdiction and functions of the court system, torts, crimes, government regulations of competition, environmental law, contracts, and sales of goods.

MUM 2707 Practical Music Business

This course covers the business and promotion of music and its related professions. Included are discussions and projects for the creation, growing, and marketing of a musical specialty. Topics include: developing and branding talent, networking with others in the field of music to promote the profession, contract terms and negotiations, pricing, and the importance of maximizing opportunity.

*University of South Florida-St Petersburg***MAN 3025 Principles of Management**

This course is designed to introduce students to the field of management. The major goal of this course is to provide students with an introduction and overview of the most important aspects of management. Specifically this class will strive to introduce students to the major activities and functions of management; to acquaint students with the role of management as it relates to overall organizational effectiveness; and to illustrate the relationship of management to other business functions.

MAN 4930 Sustainable Development

Introduction to sustainable business. Interdependent relationship of technological and social change with emphasis on evolution of models of production and service delivery, and organizational structure and functioning. Impact of demographic composition, environmental resources, economic and political structures.

BUL 3320 Business Law I

This course is comprised of a study of the nature, classification and characteristics of law including the study of jurisdiction and functions of the court system, torts, crimes, government regulations of competition, environmental law, contracts, and sales of goods.

University of Tampa

BUS 101 Introduction to Global Business

This course emphasizes global competitiveness by introducing students to the way companies operate and to how they compete with other companies. In addition, students learn about the importance of leadership, ethical behavior and corporate responsibility in becoming successful and sustaining that success. The course examines each of the functional areas in businesses and how they work together to produce the goods and provide the services that customers demand.

MGT 330 Principles of Management

This course studies the evolution and practice of the core management functions of planning, organizing, leading and controlling. A strong emphasis on leadership skills is integrated into the course content to provide the student with a framework with which to translate classroom theory and practice into individual and team performance in the accomplishment of organizational objectives.

MGT 345 Global Organizational Behavior

This course examines the influence of individual differences, ethnic, and national culture on behaviors in organizations. It addresses the questions of when and how to be sensitive to these issues, and develops skills required to effectively manage in the diverse environment of the 21st century. Within this context, the course focuses on six essential skill-building areas: managing diversity, team building, communicating, motivating, negotiating and conflict management, and creativity and critical thinking.

MGT 360 Sustainable Development

Introduction to sustainable business. Interdependent relationship of technological and social change with emphasis on evolution of models of production and service delivery, and organizational structure and functioning. Impact of demographic composition, environmental resources, economic and political structures.
